

Stem Academy

stem

The certification standard for solar and BESS professionals who install, operate, and manage PowerTrack systems. It's how great companies build more capable, more confident teams.

Installer Certification

Field · Hardware · Commissioning

Available now

A hands-on credential focused on the what, why, and how of installing Stem equipment. From physical installation and commissioning to communications, revenue metering, and troubleshooting, it builds the skills certified teams need to arrive ready and work right the first time.

PowerTrack Certification

Platform · Analytics · Asset Management

Available December 2026

A full-fledged platform fluency credential for operators and asset managers. Enrollees develop deep expertise in PowerTrack software, analytics, operations, and asset management for solar and BESS portfolios — informed by real-world experience across 200,000+ solar systems worldwide.

Why Stem Academy

For Your Company

Faster Commissioning · Warranty Protection
Lower Onboarding Costs · Priority Support Access
Higher Contractor Standards

For Your Team

LinkedIn Credential · Higher Earning Potential
Stackable at Any Pace · Multi-OEM Fluency
Improved Employee Retention
