

# Stem is a global leader reimagining technology to support the energy transition.

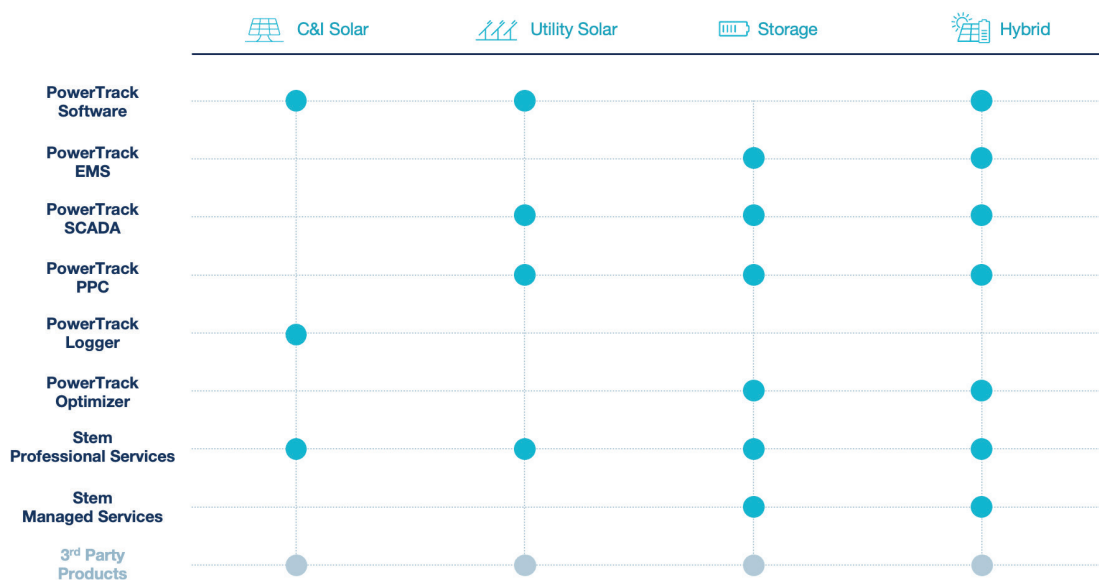

## Turning complexity into clarity, and potential into performance.

We help asset owners, operators and stakeholders benefit from the full value of their energy portfolio by enabling the intelligent development, deployment, and operation of clean energy assets. Our integrated software suite, **PowerTrack™**, is the industry standard and best-in-class for asset monitoring, supported by professional and managed services, under one roof. Meant to tackle challenges as seamlessly as possible, Stem shows the information needed clearly and accurately and helps harness raw data to inform actionable insight. With global projects managed in 55 countries – from Germany to Japan and across North America – customers have relied on Stem for nearly 20 years to maximize the value of their clean energy projects.

Driven by human and artificial intelligence – Stem is unlocking energy intelligence.

## Standard Solution by Technology End Markets

Our portfolio of products and services span the full value-chain across solar, storage and hybrid solutions

## Flexible and Integrated Solutions That Unlock the Full Value of Your Clean Energy Portfolio

A comprehensive suite of energy services supporting every phase of the project lifecycle.

### PowerTrack

The industry-leading comprehensive suite for solar and storage assets, offering advanced analytics, remote diagnostics, and performance reporting tools, including Software, Energy Management System, SCADA, Power Plant Controller and Logger solutions.

### Professional Services

Leveraging Stem’s decades-long history in the solar and storage space, Professional Services provides insights from early-stage strategy ideation, asset development and construction through performance, engineering and troubleshooting. Supported by real experts you can reach in real time.

### Managed Services

A full lifecycle of services covering the design, procurement, commissioning, operation and optimization of energy storage and hybrid systems, helping asset owners maximize reliability, performance and returns. Supported by PowerTrack Optimizer, formerly Athena.

# The Stem Difference

## Best-in-class Software

Stem's integrated software suite, PowerTrack, is the industry-standard and best-in-class for asset monitoring, supported by professional and managed services, under one roof.

## Unparalleled Experience

Stem's ability to monetize clean energy assets across thousands of projects worldwide helps customers maximize project ROI under any conditions.

## Full Lifecycle Support

Stem's breadth of energy service offerings, complete software suite and extensive industry experience ensure customers have a partner to tackle any challenge.

## Customers Standardizing on Stem

### Electric Cooperatives, Utilities, and Load-serving Entities

Stem offers seamless integration with utility programs and dispatch platforms, real-time operating visibility, and an unparalleled track record of success.

### Developers, EPCs, and O&M Providers

Stem provides full lifecycle support to sell more projects, accelerate time to value, and maximize ROI.

### Asset Owners, IPPs, CCAs, and Offtakers

Stem enables visibility into the full economic performance of clean energy profiles with the ability to leverage our advanced automation and analytics.
