

The Global Leader in AI-driven Clean Energy Solutions and Services

stem

We procure battery storage hardware for your projects
then optimize the asset value over time.

Get more value buying batteries through Stem.

We help you right-size your system, minimize risk, and avoid mistakes that can diminish ROI. Our market-leading Athena platform doesn't just maximize your investment over the lifetime of a project – its adaptability and scalability help you capture new opportunities and get projects in the ground faster. And because Stem partners with top tier battery suppliers, we can select the hardware that best suits your needs and use our buying power to get you the best deals.

SUNGROW
