

Buy Leading Stem and AlsoEnergy Products

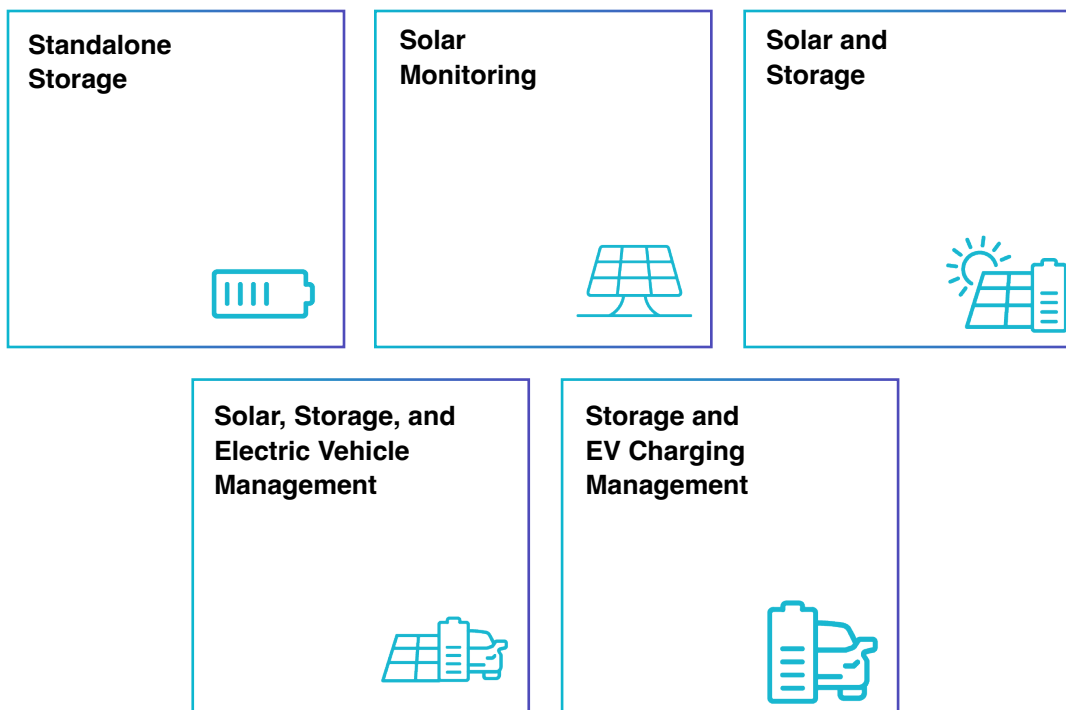

Get everything you need to optimize and monetize your clean energy assets

We offer a comprehensive selection of the hardware, software, and project services you need to monitor and optimize your clean energy assets. Save time and money by streamlining your clean energy project buying process with the experts.

1. Visit stem.com/buy

2. Choose your bundle

See next page for hardware, software, and services details of each bundle.

3. Request a quote

For custom quotes and larger system size orders, contact Stem's sales team directly at 877-374-7836. To buy through Stem's distribution partners, indicate your preference in your quote.

We're here to help

We provide clean energy project services when you request a quote from Stem, including support in:

Modeling

Tariff analysis

Competitive product pricing

Pre-construction

Procurement of storage system hardware from one vendor

Warranty administration

Ongoing system / portfolio operation and optimization

Bundle details

Standalone Storage

Hardware: Select the battery storage system size you need from leading battery manufacturers, with a variety of flexible warranty options available

Software: Athena BTM Base storage optimization, which includes utility bill optimization and reporting software

Services: Network Operating Center site setup + Monitoring service + EPC deployment supporting documentation

Solar and Storage

Hardware

- **Storage:** Select the battery storage system size you need from leading battery manufacturers, with a variety of flexible warranty options available
- **Solar:** See AlsoEnergy options in the Solar Monitoring bundle

Software

- **Storage:** Athena BTM Base storage optimization, which includes utility bill optimization and reporting software
- **Solar:** All PLCS options include a 5-year subscription to Athena PowerTrack for monitoring and optimization

Services

- **Storage:** Network Operating Center site setup + Monitoring service + EPC deployment supporting documentation
- **Solar:** Advanced site configuration services

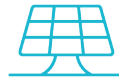

Storage and EV Charging Management

Hardware: Select the battery storage system size you need from leading battery manufacturers, with a variety of flexible warranty options available

Software: Athena EV optimization application

Services: Network Operating Center site setup + Monitoring service + EPC deployment supporting documentation

Solar Monitoring

Hardware

- **PLCS-400-CM:** Pre-configured for plug-and-play and NEMA 4 rated enclosures with data logger, RGM, power supply, 5 port ethernet switch, and 4G LTE cell mode, plus a weather station (Silicon-cell pyranometer and module temperature sensor)
- **PLCS-600-CM-BASE:** Pre-configured for plug-and-play and NEMA 4 rated enclosures with data logger, RGM, power supply, 5 port ethernet switch, and 4G LTE cell mode, plus a weather station (irradiance reference cell and module temperature sensor)
- **PLCS-600-CM-PLUS:** Pre-configured for plug-and-play and NEMA 4 rated enclosures with data logger, RGM, power supply, 5 port ethernet switch, and 4G LTE cell mode, plus a weather station (All equipment from the Base, and wind speed and ambient temperature sensors)
- **PLCS-600-CM-PRO:** Pre-configured for plug-and-play and NEMA 4 rated enclosures with data logger, RGM, power supply, 5 port ethernet switch, and 4G LTE cell mode, plus a weather station (All equipment from the Plus and a Class C pyranometer)

Software: All PLCS options include a 5-year subscription to Athena PowerTrack for monitoring and optimization

Solar, Storage, and EV Management

Hardware

- **Storage:** Select the battery storage system size you need from leading battery manufacturers, with a variety of flexible warranty options available
- **Solar:** See AlsoEnergy options in the Solar Monitoring bundle

Software

- **EV:** Athena EV optimization application
- **Solar:** All PLCS options include a 5-year subscription to Athena PowerTrack for monitoring and optimization

Services

- **Storage:** Network Operating Center site setup + Monitoring service + EPC deployment supporting documentation
- **Solar:** Advanced site configuration services
