

Simplify Your Clean Energy Management

Stem and AlsoEnergy's unified optimization platform unlocks flexibility in your clean energy portfolio

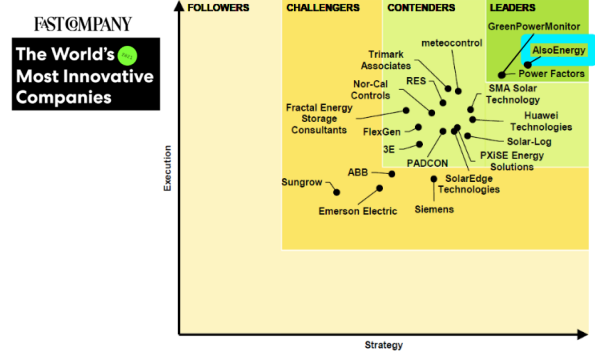

Proven Experience Across the Clean Energy Value Chain

Stem and AlsoEnergy are revolutionizing how clean energy, solar, storage, and EV charging sites are managed and optimized.

- 25+ GW solar monitoring assets under management across 200,000+ sites
- 3+ GWh of storage assets under management across 1,000+ sites
- 50+ countries worldwide with sites in operation
- 30+ million runtime hours
- 25+ intellectual property patents
- 83,000+ grid services site dispatches for 40+ utility partners
- Integration with every major utility across North America
- Real-time cloud-based product updates

Ranked #1 Solar and Storage Monitoring and Control Vendor

Guidehouse Insights Leaderboard: Solar and Storage Monitoring and Control Vendors. Published 3Q 2022

A Unified Optimization Platform with AI-driven Solutions

Stem's Athena® platform now includes AlsoEnergy's PowerTrack application and edge solutions. This leading, unified platform with AI-driven solutions now further enables seamless, lifetime management of clean energy projects and portfolios across all stakeholders - including commercial customers, project developers, asset owners, utilities, and more.

Market-Leading Technology with Comprehensive Offerings

Our AI-driven, vertically-integrated platform brings together all you need from one provider.

Software

View and optimize your solar and storage assets from one platform.

Edge Solutions

Get integrated edge controls across your clean energy asset and maximize site performance at the edge or in the cloud.

Energy Consulting and Site Optimization

Across the project lifecycle, we offer services to help to capture more value streams with our lifetime support.

Added Value for Clean Energy Portfolios

Stem is a trusted leader in AI-driven solutions with our Athena platform that unlocks flexibility across the clean energy value chain. Together with PowerTrack, the now more powerful Athena platform empowers organizations to confidently deploy and monetize clean energy technologies for assets both in front-of-the-meter and behind-the-meter:

- Lower your customer's energy bills
- Maximize wholesale energy revenues
- Optimize your solar and storage portfolio
- Seamlessly monetize demand response programs
- Manage your EV charging loads
- Monitor and report asset performance
- Deliver resilient solutions
- Use utility SCADA solutions
